of years installing: _____
of Aeratis porches installed: _____

FRAMING

- Product will be installed with a roof over it. Yes ___/No ___
- Product will be installed with frame joist 16" on center or less. Yes ___/No ___
- Additional blocking and framing will be added under the porch floor surface to support columns and porch posts. Yes ___/No ___

Recommended but not required application

- Framing will be sloped 1/4" per foot away from the house to promote water runoff. Yes ___/No ___
- Framing will be run parallel to the house to allow porch flooring to run perpendicular to the house to help promote water runoff. Yes ___/No ___

Type of Application (Select one)

_____ (a) Standard Porch Application

- Porch is 18" off the ground to the bottom of the joist framing and has clear open ventilation with the exception of brick piers, other support posts, and lattice. Yes ___/No ___

_____ (b) Cement Block /Brick Wall foundation _____ (c) Concrete Slab _____ (d) Second Floor Porch

- You plan to locate foundation wall vents every 6' to 8' around the perimeter of the porch and 6" to 8" above the grade.

(Required for "b" only)

Yes ___/No ___

- Your framing plans include a cross-hatched 2x4 sleeper system to create 3" of ventilation under the porch floor surface.

(Required for "b","c",and "d")

Yes ___/No ___

- You plan to run the cross hatched sleeper system past the joist framing to create a 3" soffit around the perimeter of the porch for ventilation.

(Required for "b","c",and "d")

Yes ___/No ___

Does the porch abut more than one wall?

Yes ___/No ___

If yes, are you planning to install standard floor register vents up against the wall of the house every 8' at a maximum. (Required for "b","c", and "d")

Yes ___/No ___

Installation

- Are you planning to secure the product with
Stainless steel barbed cleat nails and construction adhesive Yes ___/No ___
- #8 Trim-head stainless steel GRK Screws and construction adhesive Yes ___/No ___
- You understand Aeratis Porch Flooring should not be picture framed. Yes ___/No ___
- You understand that the material should be installed perpendicular to the house to promote water runoff. (This is strongly recommended/not a requirement) Yes ___/No ___
- You are planning to leave a 1/4" gap where the product meets the wall of the house. Yes ___/No ___

Painting (if desired)

- You understand that Aeratis can be painted, if desired, with **approved** paints only with colors having a LRV (Light Reflective Value) of 55 or more. Yes ___/No ___

Email photos of your porch (5 megapixels or better) *Note* These may be used in our online photo gallery.

YOUR OPINION COUNTS (Please put an X next to all those that apply)

What factors influenced you to buy Aeratis?

- Quality Yes ___
